e-Certis – The procurement map of Europe
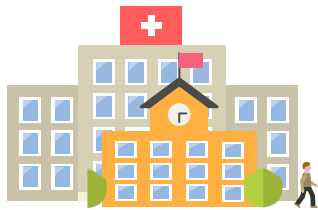

Millstream

What happens if you don't know how your equivalent procurement documents translate to documentation in other European countries?

Millstream has the answer ⓘ

e-Certis is a mapping tool that helps you identify the equivalent certificates used in public procurement in different European countries. If you are a BUYER that has to evaluate bids received from various Member States, or a SUPPLIER wishing to participate in a public procurement procedure, e-Certis can help you understand what evidence is requested or provided by the other party.

BUYERS

For BUYERS, e-Certis is built in to **myTenders** to allow users to assess eligibility for bids from suppliers located in other Member States.

- Less time spent searching and less confusion over certificates issued abroad.
- Up to date and trustworthy information.
- Integrated into **my**tenders.co.uk buyer procurement portal.

SUPPLIERS

e-Certis is built in to **TendersDirect** so SUPPLIERS can check they are submitting the equivalent documentation when responding to bids issued by other Member States.

- Helps define the documents requested by buyers.
- User friendly tool allowing suppliers to trade across borders.
- Integrated into **tendersdirect**.co.uk tender alerts service.
